

WhitePaper

What is BitcoinNFT?

BitcoinNFT is a platform for the future of financing, built for the blockchain world of Metavers. By providing tools and services, it reduces fees and creates a small cost for novices

Investors can use our services for use in the world of Metavers, for example, buying land, buying equipment and paying low-cost domestic payments.

Payments For Game

Low Fee

Saving deposits

Buy And Sell Lادن On Metaverse

Debit cards for everyday use

An exchange and a wallet in future.

Create Game

We Are In Web3 network

Below are 5 main features that can help us define Web 3.0:

Semantic Webbusiness

Artificial Intelligence

3D Graphics

Connectivity

Ubiquity

Development of a meta-world and digital currency

Legal governance, risk management, and compliance.

Starting in March, BTCNFT can be utilized for many purposes.

Decentralized Platform for Metavers and Smart Contracts.

Solutions

Protecting Investors Interests

While we are helping start-ups to raise the funds, we care about investors whose investments' protection we wish to guarantee to the maximum extent. The voting system gives the investors bigger control over their investment.

If an investor is not content with the progress and the results of a given milestone, the dissatisfaction may be expressed after every milestone during the voting process. If the majority of the investors have voted "yes", the escrow, enforced by a smart contract, will allow the use of the funds allocated for the next milestone.

We Bring together Marketplaces & Finance

The ultimate goal of BTCNFT is to be the all-in-one solution and offer a wide array of services from market to finance.

Our clients – both corporate and private ones – will access all the services they need from a single platform. Blockchain technology gives us the chance to make your finances grow faster and give better returns in metaverse world.

Token structure

Distribution of Tokens

BTCNFT Token is a platform for the future of metaverse world .

The people of our target community can create the best facilities and services for themselves in the world of Metavars

60% Pre-sell

20% Airdrop
